Analyse: medication impaired driving

Analyse medication impaired driving. (What are the parts and how do they work?)	I can identify medication impaired driving but I need help to identify the relevant parts as per the diagram below.	I can describe medication impaired driving and one relevant part from the diagram below but with no evidence.	I can **explain**: - medication impaired driving across all areas of the diagram below and is supported with evidence.	I can explain **in depth** medication impaired driving: - across all areas of the diagram below and is supported with **detailed** evidence - and the **impact** of the major determinants of health on well-being.	**and** I can **perceptively analyse** medication impaired driving by: - recommending strategies based on a **coherent explanation** that connects the New Zealand health issue and the influence of the major determinants of health on the issue to underlying health concepts (hauora, socio-ecological perspective, health promotion, and attitudes and values) - using **coherent and consistent** evidence
Effective Strategies *[insert strategies suggested by students and teachers]*				"because"	'Overall I think … because … because …"
