	Part 1	Part 2
Influencing factors		
Effects/Implications		
Strategies		

Teacher's copy – possible answers

	Part 1	Part 2
Influencing factors	Alcohol + meds	No. of medication prescribed every year – over 7 million Lack of awareness She'll be right attitude of driving Multiple medications that could interact with each other
Effects/Implications	Fatal crashes Injuries, etc Cost of repair - medical bills, police investigations Loss of income	Dizziness Slurred speech Tiredness Lack of clarity Struggle to concentrate Confusion Unable to drive due to being deemed medically unfit and forced off the road Loss of independence/Isolation Loss of income Possibly can't work if you are a driver
Strategies	Collaborative approach Safe system approach – 'safer journeys'	Conversations between patient and doctors/pharmacists. Warning labels on medication – is this enough? Repeat risks to patients Create a plan instead of driving
