

Travel safety – spreading the word

1. Safety awareness presentation

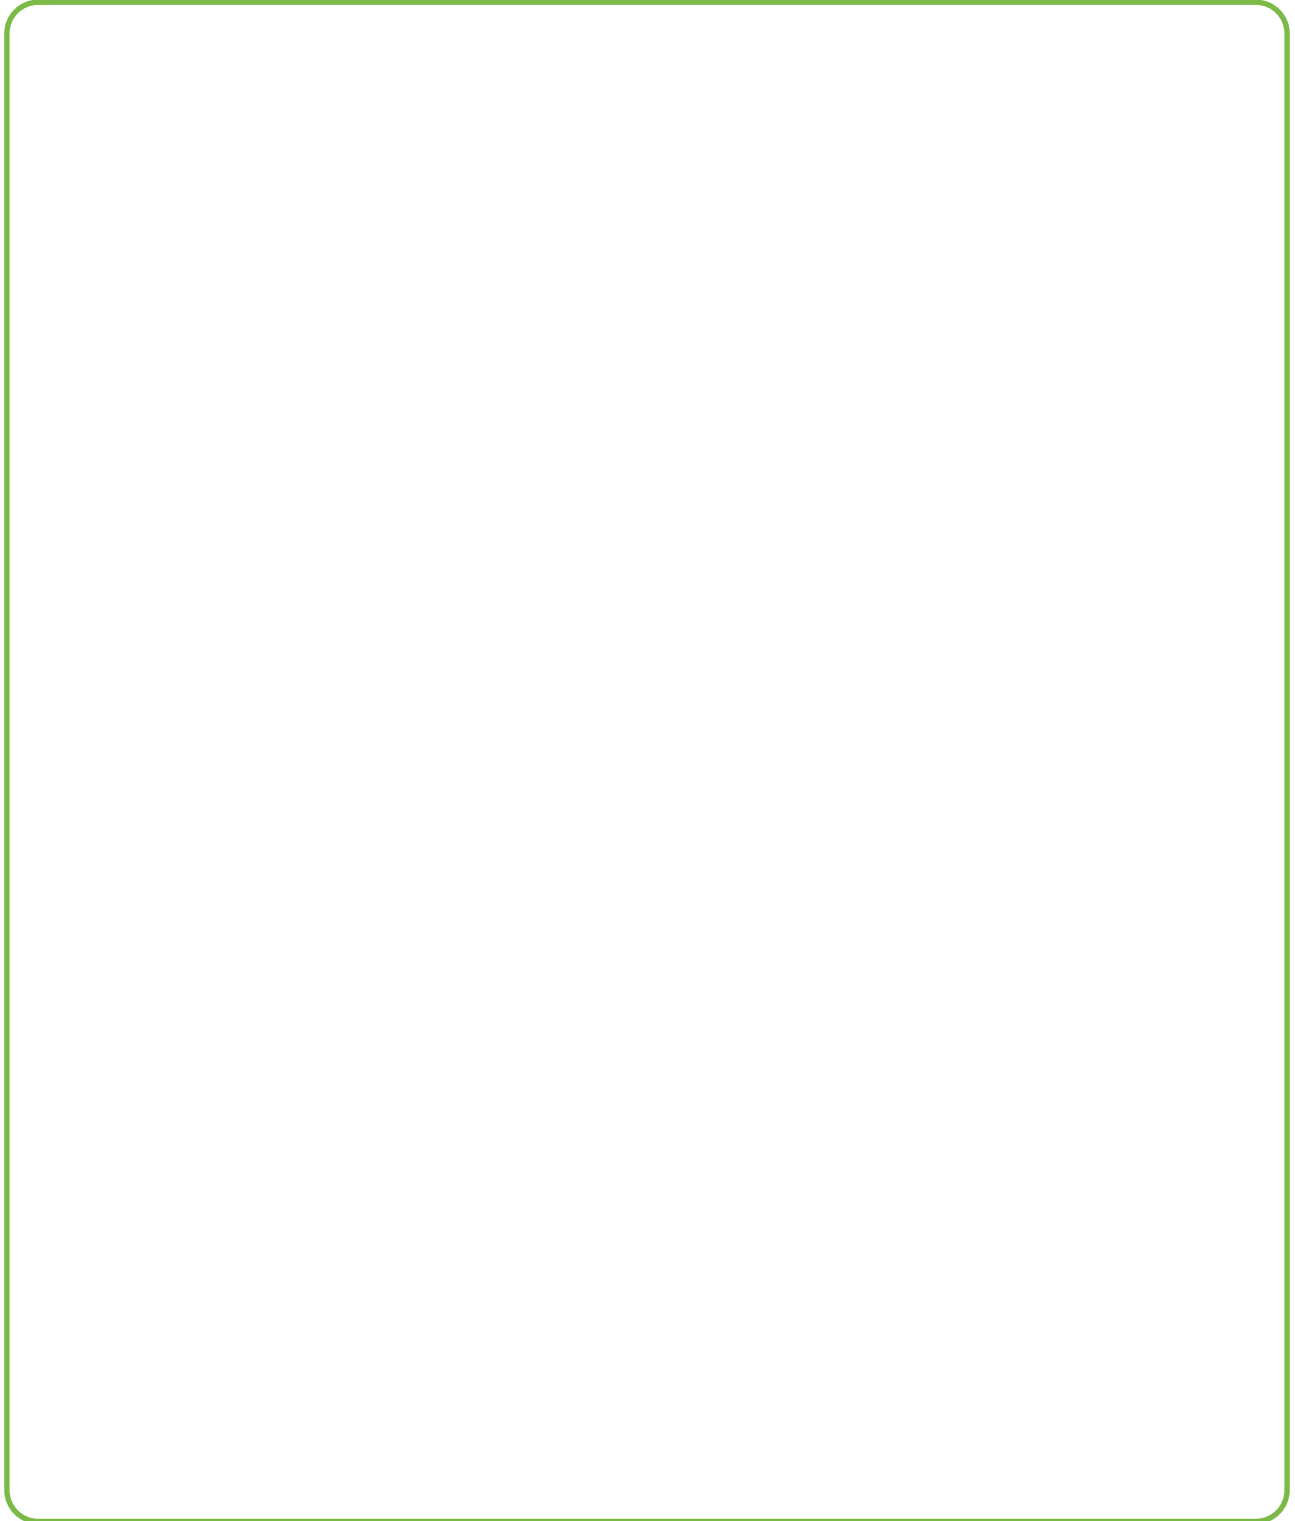

Prepare a short presentation about an identified hazard in the school community and propose solutions for spreading awareness and promoting safety.

Choose one of the identified hazards in the school community to focus on for your presentation. Fill in the information below to create your presentation:

Hazard:	
Description:	<i>Provide details, where it is etc.</i>
Possible danger:	<i>How could this hazard hurt someone?</i>
Ideas to keep people safe:	<i>What safety things can people do to stay safe around the hazard?</i>

2. Visual aids

Create a poster to enhance your presentation and engage the audience. Be creative, show the hazard and include bold text to tell people about the danger.

3. Share your presentation with the class

Use the information you recorded as well as your poster to support your presentation.

By telling people about hazards, you are helping to keep others safe. You can also tell others about your findings, including friends, family and teachers from outside of your class.
